Descarga de la aplicación:

1. You can search for “infowear” APP in App Store/App Store/Google Play and other major app stores to download it.
2. Use the scan function to scan the code QR attached to download.

Note: After the download and installation are successful, please register and log in according to the prompts on the interface for a better experience and use of this product.

Connect:

Use the Infowear app on your phone to sync your watch.

Connection operation method: Open App - Device - click to add a device - Select device - Connected successfully - You can complete pairing.

P.S:

To successfully connect the watch and mobile phone, you need to turn on the Bluetooth connection device of the mobile phone.

2.To use the Android mobile application, the user must grant location permission and activate the location information function of the mobile phone system; otherwise, the device may not be searched for.

Firmware update.

The app will prompt that there is a new firmware version, and the user can enter the device interface of the app and select the firmware upgrade. The watch can work when the battery is above 60%. If the update fails, just wait for the watch to reboot automatically, and then connect to the APP again to do the update operation.

Characteristics

Smart watch support: GPS, GLONASS

Triple positioning/blood oxygen detection/continuous heart rate monitoring/music/weather control/sleep monitoring/remote camera etc.

Safety instructions

1. Although smart watches can detect dynamic heart rate in real time, they cannot be used for medical purposes.
2. Please do not disassemble or modify the equipment and accessories without authorization, please contact after-sale service when the equipment fails.
3. If the equipment is not used for a long time, be sure to recharge it once every three months.

Warranty:

We do not advise immersion of watches and we do not accept their return as a guarantee, since we consider them only **IMPERMEABLE**.

We also do not recommend having a shower with it, as the hot water vapor can affect both the battery and the clock module. Also avoid sudden changes in temperature.
